

Update of HHRA Activities

- **Status of the HHRA and the Peer Review Process**
- **The Flin Flon Soils Study – Summary Report**
- **Next steps**

Community Advisory Committee Meeting, Tuesday December 1st, 2009

Status of the HHRA and the Peer Review Process

- Response to IERP comments near completion
- Revisions to HHRA report near completion
- TAC to review final HHRA draft
- HHRA to be finalized
- Results of HHRA and Evaluation of Exposure Study to be integrated as part of the Flin Flon Soils Study – Summary Report (the ‘bridging’ document)

The Flin Flon Soils Study – Summary Report

- A plain language (non-technical) report addressing each element of the Flin Flon Soil Study process. Sections will include:
 - a summary of the soils data collected by Manitoba Conservation that led to this study
 - A summary of the Flin Flon Soils Study process (TAC, CAC, etc.)
 - A summary of the HHRA
 - A summary of all supplemental data utilized in the HHRA
 - A summary of the IERP process
 - A summary of the Health Status review completed by the MOHs
 - A summary of the Evaluation of Exposure study
 - A qualitative Ecological Risk Assessment
 - A summary conclusion that integrates the HHRA, the Health Status review and the Evaluation of Exposure study
 - A conceptual risk management plan (if necessary)

Next Steps

- Once the summary document is complete, the communications sub-committee will consider the next steps:
 - Results will be released to the CAC
 - Results will be released to the general public
 - Open houses
 - Media releases
 - Documents will be publically available
