

Update on HHRA

- Draft HHRA Report Issued to TAC
- Updated Gantt Charts

*Community Advisory Committee Update,
Monday, January 26th, 2009*

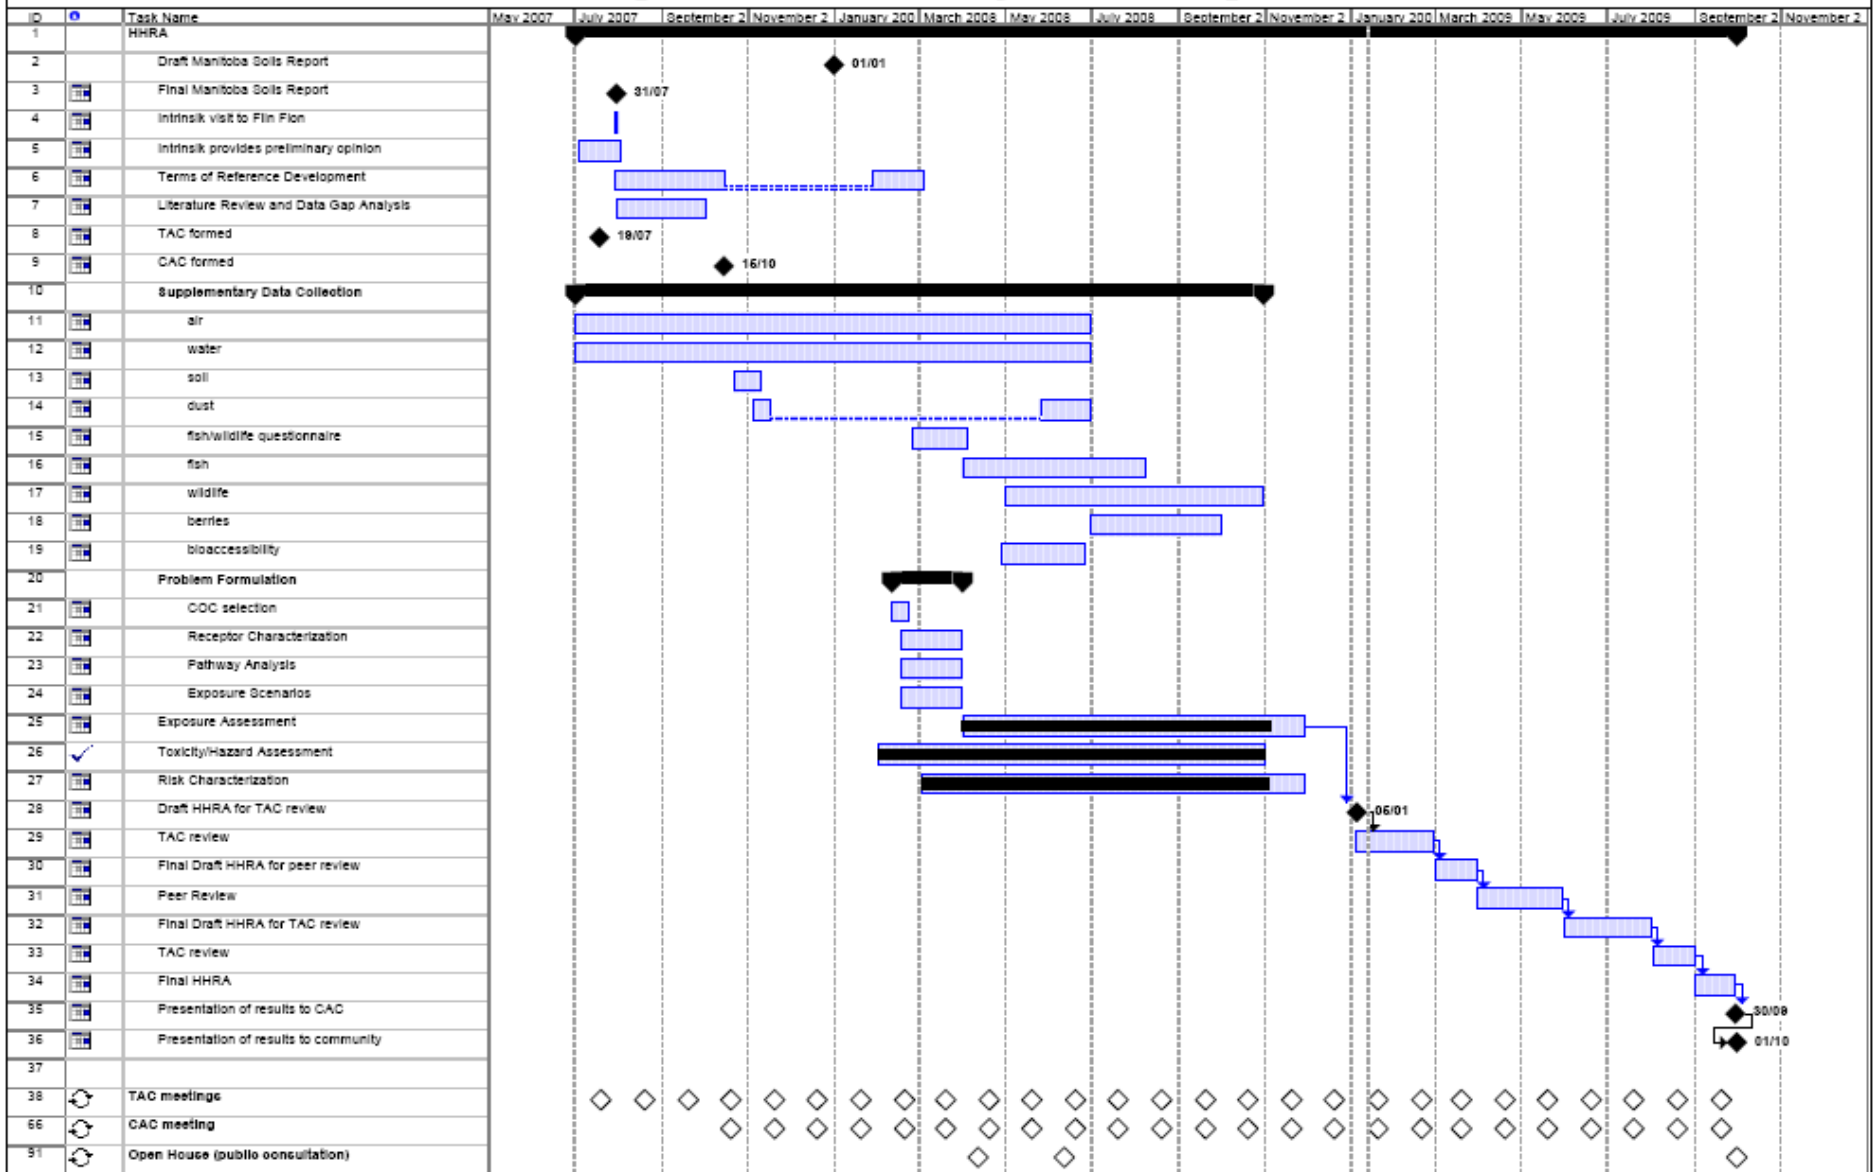

Draft HHRA Report

- Draft HHRA report issued to TAC, including the CAC observers, on January 5th, 2009.
- The draft report, with appendices, consists of approximately 1650 pages
- As previously indicated, the draft HHRA will undergo an extensive review process, both by the TAC and subsequently by an independent expert review panel (IERP) prior to the document being publicly released.
- This is to ensure that the report has been fully reviewed and vetted as to the accuracy of its content and the correct application and interpretation of the current science in this field.
- As has been the practice throughout the study to date, the report will not be made publicly available until the review process is completed in its entirety.

Draft HHRA Report

- Independent Expert Review Panel - Request for Proposal to form IERP posted on MERX
- IERP review process anticipated to take around three months, commencing early April.
- Intrinsik will then produce a final draft report incorporating IERP comments, etc.
- Final Draft Report then goes through final review by TAC
- Report then finalized ready for issue – target October 1, 2009.
